Red Hat Enterprise Linux Production Phases

Full Support Phase^{iv}:

During the Full Support Phase, [Red Hat defined](#) Critical and Important Security errata advisories (RHSAs) and Urgent and Selected (at Red Hat discretion) High Priority Bug Fix errata advisories (RHBAs) will be released as they become available. Other errata advisories may be delivered as appropriate.

If available, new or improved hardware enablement and select enhanced software functionality may be provided at the discretion of Red Hat, generally in minor releases. Hardware enablement that does not require substantial software changes may be provided independent from minor releases at Red Hat's discretion.

Minor releases will also include available and qualified errata advisories (RHSAs, RHBAs, and RHEAs). Minor releases are cumulative and include the contents of previously released updates. The focus for minor releases during this phase lies on resolving defects of medium or higher priority.

Updated installation images will be provided for minor releases during the Full Support Phase.

Maintenance Support Phase :
