

We have just one goal:

To give users the right version of whatever they need.

Step 1:
We build modules.

Step 2:
We ship artifacts.

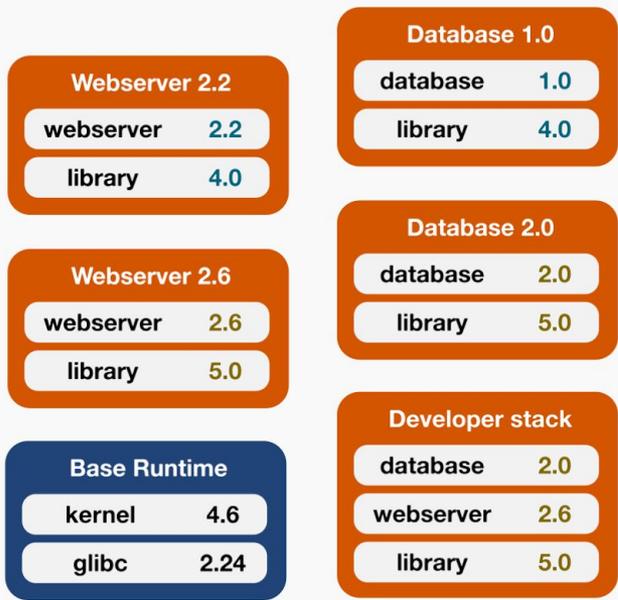

Step 3:
Users deploy as they like.

Step 1: We build modules.

Step 2: We ship artifacts.

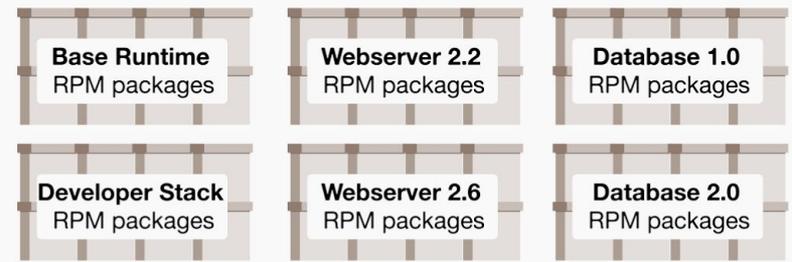

Step 3: User

modules
(binary)

Dockerfile

artifacts
(consumable binary)

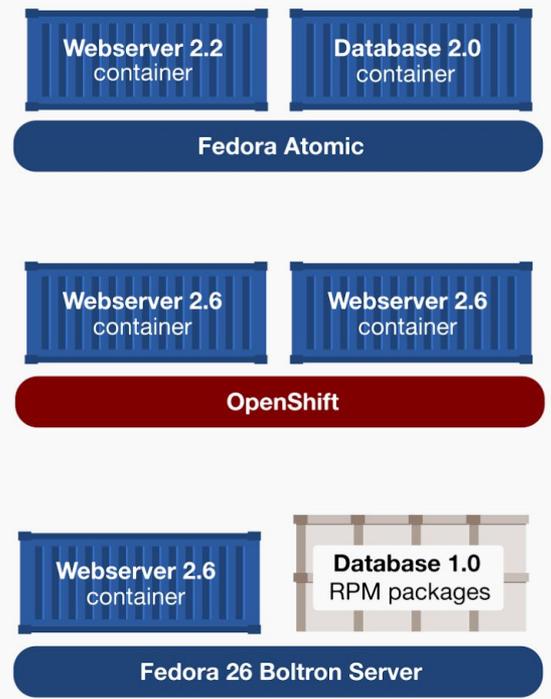

Step 2: We ship artifacts.

Step 3: Users deploy as they like.

- Database 1.0
base 1.0
ary 4.0
- Database 2.0
base 2.0
ary 5.0
- Developer stack
base 2.0
server 2.6
ary 5.0

artifacts
(consumable binary)

deployment
(happiness)
